

## CITY OF HAYWARD AGENDA REPORT

Meeting Date 02/28/02  
Agenda Item 1

**TO:** Planning Commission

**FROM:** Tim Koonze  
Assistant Planner

**SUBJECT:** **Zone Change No. PL-2001-0223 and Tentative Tract Map No. 7341 – Brian Purcell for PF Trust (Applicant), Brian and Kimberly Purcell (Owners):** Request to Raze an Existing Single-Family Dwelling, Vacate Excess Right-of-way at the Corner of Alice Street and Winton Avenue and to Rezone Property from Commercial Office (CO) District to Planned Development (PD) District and Approve a Tentative Tract Map for the Purpose of Constructing Eight Townhouses

*The Project Is Located at 338 Winton Avenue at the Northwest Corner of Alice Street*

### RECOMMENDATION

It is recommended that the Planning Commission recommend to the City Council to:

1. Adopt the Negative Declaration;
2. Approve the razing of the single-family dwelling;
3. Vacate excess right-of-way at the corner of Alice Street and Winton Avenue;
4. Approve the zone change application, the preliminary development plan, and site plan review application subject to the attached findings and conditions of approval; and
5. Approve Tentative Map Tract 7341 subject to the attached findings and conditions of approval.

### DISCUSSION

#### Setting

The 30,821-square-foot (0.71-acre) parcel is located on the northwest corner of Winton Avenue and Alice Street and contains a single-family home with an attached garage, intended for demolition in order to make room for the project. A mixture of single- and multi-family dwellings and a commercial office surround the project site. The General Plan Map land use designation is Medium Density Residential (MDR). The property is in the Commercial Office District, which permits multi-family dwellings as a primary use. Single-family dwellings are allowed with approval of an administrative use permit.

The project is located approximately a half mile from the Hayward BART Station. The site is also located within walking distance of three AC Transit bus lines: Line 86 on D Street and Winton Avenue serving BART and the Industrial Corridor; Line 77 connecting to both BART stations and the southerly part of the Industrial Corridor; and Line 386 with weekend service to Southland Mall. A neighborhood-serving shopping center is located less than 200 feet from project site at Grand Avenue and Jackson Street. The project is approximately ½ mile from Centennial Park, Cannery Park and public amenities such as Hayward City Hall, the C Street Post Office and the main library.

### Project Description

The project consists of 8 detached 2-story townhouse units, seven of which face Alice Street and one that faces Winton Avenue. The garages are located at the rear of the units and are served by a driveway that runs along the rear of the property. This driveway is accessed from Alice Street but there is also an emergency vehicle access to Winton Avenue. The single access into the site reduces conflict points on Alice Street and allows for more on-street parking along the Alice Street frontage.

The existing single-family dwelling, built c. 1939, must be razed to accommodate the proposed development. An initial study performed by staff concludes that the existing dwelling is not historically or architecturally significant. All existing trees on the site are to be removed with the exception of a tulip tree that will be required to be relocated along the Alice Street frontage to a location approved by the City's Landscape Architect.

### Architecture

The proposal incorporates three unit designs with varied elevations. Plan A is 1,626 square feet in area and Plan B is 1,786 square feet in area, both have three bedrooms; Plan B also contains a den on the second floor. Plan C has a floor area of 1,252 square feet consisting of two bedrooms, one on each floor with a living room on the second floor. Units A and B have two-car garages. The developer is proposing Unit C to have a single-car garage and a one-car carport. Staff is recommending a redesign of Unit C to a more typical townhouse floor plan, living area below with bedrooms above, and to incorporate a two-car garage similar to the other units within the project.

All units are equipped with laundry areas within the unit and trash/recycle enclosures accessible from the courtyard entrance. Non-operable windows located in the walls that face the courtyard are situated well above eye level of the occupants of the units so as to allow "borrowed light" into the dining room and a hallway, while maintaining privacy for those using the courtyards.

The two-story simplified stick Victorian design has earth tone colored horizontal hardboard siding. Staff is recommending that varied finishes be used such as a brick veneer along the bottom or vertical siding on the upper floors. Additional design elements characteristic of stick Victorian homes should be added such as decorative trusses in gables, exposed rafter ends supporting the eaves, and diagonal porch-support braces. A more varied color pallet would support the architectural individuality of the three designs.

There are three different roofline designs: a multi-leveled shed roof with a gabled transom; a gable with a smaller gable projection; and a split leveled gable roof with shed roof projection. Staff is of the opinion that although the variety will provide an interesting streetscape, hip roof elements should be used on gables facing adjacent units to create a larger sense of spacing between units and to open up the roofline.

By accessing the garages from a common drive located to the rear of the units, the garage door element is removed from the elevations fronting Alice Street and Winton Avenue creating a more quaint appearance. The large covered front porches on the Alice Street frontage are an attractive feature that supports a sense of community by providing a usable space to interact with neighbors and use for surveillance of the neighborhood.

### Open Space

All units are provided with a 300 square-foot private open courtyard located between each townhouse except the two end units. Unit 1 has a 400 square-foot deck area above the garage and Unit 8 has a 600 square-foot private open courtyard along the project's north property line. To satisfy the open space requirements of 350 square-feet per unit an 800 square-foot group open space is located in the middle of the project equipped with a barbecue and picnic bench. Staff is recommending that Unit 1, which is located along the Winton Avenue frontage and is using a deck for private open space, be relocated adjacent to the proposed group open space to allow easier access to the ground group open space and its amenities. Each unit has a usable, covered front porch facing the street that serves as additional open space and ties this project to the neighborhood by providing an interfacing, usable space.

### Landscaping

The applicant is required to provide a landscape plan prepared by a licensed landscape architect that incorporates the landscaping of all common areas. The design will include a mound within a landscaped parkway along the Winton Avenue frontage. The common area will include all areas outside of the buildings and the private courtyards. A homeowners association will be established to maintain all common area landscaping, irrigation and group open space amenities.

### Tentative Tract Map

The tentative tract map subdivides the 30,821-square-foot site into 8 townhouse parcels and 1 common parcel for a total of 9 parcels.

A townhouse subdivision differs from a condominium subdivision. Within a condominium subdivision an individual owns the air space within a unit but the building(s) and all the land within the subdivision are under common ownership. A townhouse subdivision allows an owner to own the building, a small plot of land under the building, and usually an adjoining patio area; the remaining land within the subdivision is under the common ownership of all owners within the subdivision. Both require the formation of a homeowners association and the creation of Conditions, Covenants and Restrictions (CC&R's) to maintain the common areas.

There are utilities available in both West Winton and Alice Street to adequately serve this project. Both streets are at their ultimate street width and are fully improved. Some of the existing street improvements need to be repaired and a condition of approval has been added to ensure these repairs are performed prior to the City accepting the required public improvements as being complete.

#### Vacation of Excess Right-of-Way

There is some excess right-of-way at the northwest corner of Alice Street and Winton Avenue that the City is vacating at the request of the developer. The vacation will occur after the tentative map has been approved but prior to the approval of the final map.

#### Planned Development District

The zone change from *Commercial Office (CO) District* to *Planned Development (PD) District* is a procedural means to allow townhouse development where the property under the units is owned by the owner of the unit. Development of residential units in the CO District requires conformance to the standards of the General Policies Plan map designation. In this instance, the General Plan designation is *Medium Density Residential (MDR)*, requiring the development to meet the zoning standards of the *Medium Density Residential (RM) District*. The selected style of townhouse is a "hybrid" which falls between connected multifamily units and detached single-family homes. The townhouses are designed like multifamily units with living area on the first floor and bedrooms on the second floor. Unlike multifamily units, the proposed townhouses are detached, separated by private courtyards, and are located on individual properties that include not only the unit but also the private courtyards.

The parcels are small by necessity and therefore do not meet the minimum lot size of 5,000 square feet required by the RM District necessitating approval of a Planned Development District. The small lot characteristics associated with townhouse subdivisions require reductions in lot size and building setbacks, however, these same characteristics allow for ownership of a detached home with a private courtyard. This development's unique design allows the City to not only continue its policy of providing home ownership but takes it a step further than a multifamily condominium development by allowing ownership of detached units.

#### **ENVIRONMENTAL REVIEW:**

In accordance with California Environmental Quality Act (CEQA) Guidelines, it was determined that this project could not have a significant impact on the environment and a negative declaration has been prepared.

#### **PUBLIC NOTICE:**

On February 15, 2002, a Notice was mailed to every property owner and occupant within 300 feet of the subject site, as noted on the latest assessor's records. Notice was also provided to the Burbank Neighborhood Taskforce. The notice was also published in the Daily Review.

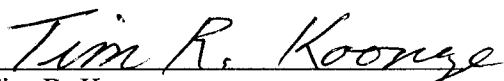

An Alice Street resident who lives across the street from the project is concerned with the amount of traffic that will be generated, since the driveway of the project is in front of his property. In addition he was concerned that street parking in front of his house would not be available for his use. Staff explained that the project would generate a relatively small amount of traffic (47 trips a day, 3-4 during peak hours). Any office use would generate twice that amount and a retail use would even more traffic. It is staff's opinion that there is adequate parking provided for the project as each unit will have a two-car garage, there are two on-site parking stalls and 10 on-street parking spaces along the Alice Street frontage. The resident was also concerned that the headlights of vehicles exiting the project will shine into his front living room. The plan has been revised and the driveway no longer conflicts with his living room window.

A resident that lives near the intersection of Meek Avenue and Alice Street stated that he and his wife support the project and believe that it will raise neighborhood property values. He also was pleased that the project would replace a house and a property that have not been well maintained in the past.

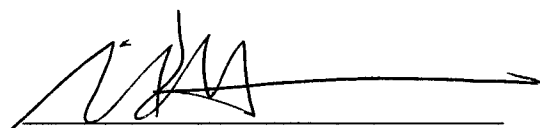

## CONCLUSION

The detached townhouse development projects the goals of the City by creating ownership housing. The project is well designed in that each unit has a private courtyard area with the exception of unit 1C which utilizes a deck. The architect has created a stick Victorian design that fits well into the established neighborhood. The single access driveway serving the units from the rear allow the garages to face the rear creating a pleasant streetscape while providing the maximum number of on-street parking stalls. It is staff's opinion that this development is beneficial to the neighborhood and the Citizens of Hayward.

SPR 01-130-12

Address: 338 Winton Avenue

Applicant: Brian Purrell for PF Trust

Owner: Brian & Kimberly Purrell

ATTACHMENT A

**Zone Change**  
**Brian Purcell for PF Trust (Applicant)**  
**Brian and Kimberly Purcell (Owners)**  
**Findings for Approval**

- A. The proposed project will not have a significant effect on the environment. A Negative Declaration has been prepared pursuant to the California Environmental Quality Act.
- B. Substantial proof exists that the proposed change will promote the public health, safety, convenience, and general welfare of the residents of Hayward in that the 8 townhouses will be available for homeownership;
- C. The proposed change is in conformance with the purposes of this Ordinance and all applicable, officially adopted policies and plans in that the zone change meets the policies of the General Plan Medium-Density Residential designation;
- D. Existing streets and public facilities are adequate to serve the 8-unit townhouse development in that the exiting capacities of the street system, the sewer and storm drain system and water system are able to accommodate this development.
- E. The residential uses permitted when the property is reclassified will be compatible with present and potential future uses allowed in the surrounding Medium-Density Residential District, and, further, a beneficial effect will be achieved, which is not obtainable under existing regulations, in that the 8-townhouse project can be built on a property that is not currently developed to its potential as prescribed by the General Policies Plan and the Burbank Neighborhood Plan.

**Preliminary Development Plan  
Brian Purcell for PF Trust (Applicant)  
Brian and Kimberly Purcell (Owners)  
Findings for Approval**

- A. Approval of the preliminary development plan, as conditioned, could not have a significant impact on the environment, cumulative or otherwise, and a Negative Declaration has been prepared.
- B. The 8 townhouse development is in substantial harmony with the surrounding single- and multiple-family structures and the General Plan designation of Medium-Density Residential and the Burbank Neighborhood Plan in that this site is recognized to be developed with high density multi-family housing.
- C. Existing and proposed streets and utilities are adequate to serve the development. The street is of an adequate size to accommodate the additional traffic trips that will be generated by this project.
- D. The development creates a residential environment of sustained desirability and stability in that adequate open space has been provided, there is pedestrian access to parks and residential amenities. In addition, the 8 townhouses will have no substantial adverse effect upon surrounding development in that it is compatible with the residential neighborhood and consistent with the housing density permitted on this site by the General Plan and the Zoning Ordinance.
- E. The exception to the minimum lot size of 5,000 square feet and the 5 foot side yard setback as required by the Commercial Office District development standards is minor in nature in that 8 units will be available for home ownership which is one of the goals of the City and the project otherwise meets the development standards, including density, set forth in the General Policies Plan and the Zoning Ordinance.

**Zone Change and Preliminary Plan  
Brian Purcell for PF Trust (Applicant)  
Brian and Kimberly Purcell (Owners)  
Conditions of Approval**

1. The proposed improvements shall be constructed and installed according to the preliminary plans labeled Exhibit "A", except as required to be modified by these conditions of approval. This approval is void one year after the effective date of approval unless prior to that time a building permit has been accepted by the City of Hayward Building Official to construct the project. Any modifications to the approved plans or conditions shall require prior review and approval from the Planning Director.
2. The permittee shall assume the defense of and shall pay on behalf of and hold harmless the City, its officers, employees, volunteers and agents from and against any or all loss, liability, expense, claim costs, suits and damages of every kind, nature and description directly or indirectly arising from the performance and action of this permit.
3. Prior to issuance of a building permit, the Precise Plan shall be submitted for approval of the Planning Director and shall include detailed landscaping and irrigation plans for all common areas, detailed plans for all site amenities within the common recreation areas, details for decorative paving within the private streets, details for fencing of private yards and decks, exposed retaining walls, safety railings and barricades, architectural plans with enhanced side elevations where no windows will be utilized, sign details, samples of colors and materials for all exterior building finishes, and screening of all above-ground utilities, transformers and utility.
4. Prior to final inspection of the townhouses or occupancy (whichever occurs first), all improvements and conditions of approval shall be completed to the satisfaction of the Planning Director.
5. The final map shall be approved by the City and filed in the County Records Office prior to the issuance of a building permit of any home within the subdivision with the exception of those homes used as models.
6. Prior to the sale of any individual unit, or prior to the acceptance of tract improvements, whichever first occurs, a homeowners' association shall be created to maintain the common area landscaping, open space amenities and perimeter masonry walls. Each owner shall automatically become a member of the association and shall be subject to a proportionate share of maintenance expenses. A reserve fund shall be maintained to cover the costs of replacement and repair.

7. The applicant shall maintain in good repair all fencing, parking and street surfaces, common landscaping, lighting, trash enclosures, drainage facilities, project signs, etc. Individual homeowners shall maintain in good repair the exterior elevations of their dwelling. The CC&Rs shall include provisions as to a reasonable time period that a unit shall be repainted, the limitations of work (modifications) allowed on the exterior of the building, the formation of a design review committee and its power to review changes proposed on a building exterior and its color scheme, and the right of the homeowners association to have necessary work done and to place a lien upon the property if maintenance and repair of the unit is not executed within a specified time frame. The premises shall be kept clean. Any graffiti painted on the property shall be painted out or removed within seven days of occurrence.
8. The garage of each unit shall be maintained for off-street parking and shall not be converted to living or storage areas. An automatic garage door opening mechanism shall be provided for all garage doors. This requirement shall be incorporated into the CC&Rs.
9. The homeowners association shall be responsible for implementing all storm water measures and shall maintain in good repair all streets, parking surfaces, common area and front yard landscaping and irrigation, street lighting, drainage improvements and the masonry walls along the north and west property lines. Any graffiti painted on the masonry wall shall be painted out or removed within seven days of occurrence.
10. Prior to the sale of any townhouse, Covenants, Conditions and Restrictions (CC&R's) shall be created and recorded in the Alameda County Recorder's Office. The CC&R's shall be subject to the review and approval of the City Attorney prior to recordation. The CC&R's shall stipulate that the garage of each unit shall be maintained for off-street parking and shall not be converted to living area or storage.
11. Residents within the project shall not use open parking spaces. Spaces shall be marked as "visitor only". The project homeowners association shall remove vehicles parked contrary to this provision. This requirement shall be reflected in the CC&Rs.
12. The pavement at the driveway entries shall be enhanced by the use of decorative pavement materials such as colored, stamped concrete (bomanite or equal), brick, concrete interlocking pavers or other approved materials. The location, design and materials shall be approved by the Planning Director.
13. Any appropriate historical artifacts unearthed on the site in connection with the construction of the proposed project shall be offered to the Hayward Area Historical Society at no charge.
14. If any human remains are found during grading or construction, all work will be stopped and police called to investigate.
15. Utility meters shall be located at the sides of the residences and shall be screened by plant material or other approved material and shall provide sufficient distance for reader access.

16. Mechanical equipment, such as air conditioners, shall be prohibited on the roof of any building.
17. The Planning Director shall approve the colors and materials of the structures prior to the issuance of the building permit.
18. Building permit applications for the townhouses shall include drainage plans. The plan shall also include water meter locations and the location of water services and sewer laterals.

#### **Fire Department**

14. The building occupancy classification shall be "R-3" for the townhouses and "U-1" for the garages.
15. All curbing except for those along designated parking spaces within the proposed development shall be painted red. "No Parking-Fire Lane" signage shall be posted at every 100' linear feet throughout the development's private driveway.
16. All buildings shall have individual address numbers posted so as to be visible from the street. Address numbers shall be a minimum of 6-inches, or 4-inches if internally illuminated.
17. Smoke detectors are required per the Uniform Building Code.
18. Any gates across the emergency vehicle access to Winton Avenue shall be equipped with a lock box or similar device approved by the Fire Marshall.

#### **Utilities**

19. Prior to granting occupancy, water services shall be installed by City crews at developer's expense. The application for water services shall be presented to the City inspector.
20. It is recommended that a separate irrigation meter be installed for common landscape areas. Install Reduced Pressure Backflow Prevention Assembly on the irrigation water meter as per city of Hayward Standard Detail 202.
21. Only water Distribution Personnel shall perform operation of valves on the Hayward Water System. Please note this requirement on the plans submitted for a building permit.
22. Water and sewer service available subject to standard conditions and fees in effect at time of application.
23. Development to be served by radio read meters.

## **Miscellaneous**

- 24. Each unit shall be equipped with security lighting over the garage.
- 25. The front door of each unit shall be equipped with a 180-degree security viewfinder.

## **Architecture & Site Planning**

- 26. Decorative paving shall be installed in the proposed private courtyards.
- 27. Redesign Unit C to a more typical townhouse floor plan, living area below with bedrooms above, and to incorporate a two-car garage similar to the other units within the project.
- 28. Relocate Unit C so that it is located adjacent to the group open space. The relocation details shall be approved by the Planning Director.
- 29. Utilize varied finishes on the townhouses such as a brick veneer along the bottom or vertical siding on the upper floors. Additional design elements characteristic of stick Victorian homes should be added such as decorative trusses in gables, exposed rafter ends supporting the eaves, and diagonal porch-support braces. A more varied color pallet would support the architectural individuality of the three designs. Modifications shall be approved by the Planning Director prior to the issuance of a building permit.
- 30. Utilize hip roof elements on the gables facing adjacent units to create a larger sense of spacing between units and to open up the roofline.
- 31. A picnic table, bench, and barbeque shall be installed in the group open space area.
- 32. All the windows shall have decorative windowsills.
- 33. Each dwelling unit shall have and maintain a minimum of 90 cubic feet of dedicated storage area, above standard closets and bedroom wardrobes, accessible from the exterior of the unit. Any area of a garage, in excess of the 20' X 20' parking area required for each unit, can be counted toward the minimum requirement.
- 34. Roof-mounted mechanical equipment is prohibited.

## **Landscaping**

- 35. Prior to issuance of a building permit, detailed landscape and irrigation plans shall be approved by the City Landscape Architect prior to issuance of building permits to any of the units. The plans shall include the following:
  - a. The irrigation system shall include an automatic controller;
  - b. Front and side street yards shall be limited to a maximum of 50 percent fescue turf;

- c. A hose bib shall be provided in the front and rear yard of each unit.
- d. A street tree plan with a minimum of one 15-gallon street tree shall be provided for every 50 linear feet of street frontage or fraction thereof. Street trees shall be located a minimum of 5 feet from utility lines and paving. Trees may be grouped to create a more natural effect. Trees shall be double staked per City standard SD-122.
- e. Retain tulip tree (*liriodendron tulipifera*) that is between lots 3 and 4. Specify tulip tree as the required street tree along the Alice Street frontage.
- f. Provide a 15-gallon tree spaced at 20 feet on center along the exterior property line. Trees shall be planted according to the City Standard Detail SD-122.
- g. Provide vines on fence/wall along the exterior property line. Space vines a maximum of 10 feet on center.
- h. Landscaping and street trees shall be installed in common areas as indicated on the preliminary landscape plan.
- i. Landscaped areas adjoining drives and/or parking areas shall be separated by a 6-inch high class "B" Portland Cement concrete curb.

36. Submit a Landscape Water Use Statement.

37. Construction Administration services shall be provided by the project Landscape Architect. Services to include:

- a. Observation of irrigation system before burying pipes.
- b. Observation of plant material upon delivery to site.
- c. Observation of layout and placement of plant material at time of planting and completion of placement of soil mix.
- d. Observation for Maintenance Period Commencement.
- e. Observation for Final Acceptance

38. The mailboxes for all units shall be located in a central location. A decorative shelter shall be provided to the satisfaction of the Post Master. The Planning Director shall approve the design.

39. Landscaping and trees shall be installed prior to occupancy of the townhouses, unless otherwise approved by the City's Landscape Architect.

40. Prior to certificates of occupancy, the required park dedication in-lieu fee shall be paid to the City. Park dedication fees will be due for 8 new multi-family dwelling units, with credit for 1 existing dwellings to be removed, to be paid prior to approval of occupancy. Per the City's Parkland Dedication Ordinance, the amount of the fee shall be in accordance with the fee schedule in effect at the time of issuance of the building permits.

41. For the installation of common area landscaping, the developer shall maintain the landscaping for a minimum of one year following acceptance of tract improvements. The City may require a security deposit, bond, or surety to guarantee the maintenance of the landscaping.
42. The planting and maintenance of shrubs must not impair visibility at street and driveway/street intersections. The height of plant materials in areas where sight distance is critical is limited to three feet. Trees in these areas must be pruned such that the canopy provides adequate visibility.
43. Utility meters, when not enclosed in a cabinet, shall be screened by either plant materials or decorative screen, allowing sufficient access for reading.
44. Landscaping shall be maintained in a healthy, weed-free, condition at all times, with replacement plants provided where necessary. Required street and on-site trees that are severely topped or pruned shall be immediately replaced, as determined by the City Landscape Architect.

#### **Fences**

45. A 6-foot high masonry wall shall be erected along the north and west property lines. The wall shall be treated with a graffiti sealant.
46. A six-foot high redwood fence shall enclose the proposed private courtyards. The design of the fence shall be approved by the Planning Director.

#### **Solid Waste**

47. Adequate storage space for garbage/recycling containers shall be provided within the courtyards for each unit and shall be accessible for collection. Size and location shall be designed to the satisfaction of the City of Hayward Solid Waste Manager.

#### **Construction Activities**

48. All construction and demolition debris waste shall be recycled. Applicant is required to submit a Construction and Demolition Debris Recycling Statement and Summary Report.
49. The applicant shall submit a construction Best Management Practice (BMP) program for review and approval by the City prior to the issuance of any building permits. The general contractor and all subcontractors and suppliers of material and equipment shall implement these BMP's. Construction site cleanup and control of construction debris shall also be addressed in this program. The applicant is responsible for ensuring that all contractors are aware of all storm water quality measures and ensure that measures are implemented. Failure to comply with the approved construction BMP's will result in the issuance of correction notices, citations or a project stop work order.

50. The project plans shall include storm water measures for the operation and maintenance of the project for the review and approval of the City Engineer. The project plans shall identify BMP's appropriate to the uses conducted on-site to effectively prohibit the entry of pollutants into storm water runoff facilities. The project plan shall also include erosion control measures to prevent soil, dirt and debris from entering the storm drain system, in accordance with the regulations outlined in the ABAG Erosion & Sediment Control Handbook.
51. Construction activities shall be limited to the hours of 7:30 AM to 6:00 PM on weekdays only; there shall be no construction activities on the weekend or National holidays.
52. Construction equipment shall be properly muffled, and unnecessary idling shall be prohibited.
53. Stationary noise-generating construction equipment, such as compressors, shall be located as far as practical from occupied residential housing units.
54. The developer shall provide the Planning Director with the name and telephone number of the developer or the developer's representative who may be contacted during the construction phase regarding neighborhood complaints or concerns.

**General**

55. Prior to final inspection, City of Hayward Interim Supplemental Building Construction & Improvement Fee, City of Hayward Construction & Improvement Fee, and Hayward Unified School District Fees shall be paid.
56. The Planning Director may approve any minor alterations to the proposed design, which does not require a variance to any zoning code.
57. Violation of conditions is cause for revocation of this permit, subject to a public hearing before the duly authorized reviewing body.

**FINDINGS FOR APPROVAL  
TENTATIVE TRACT MAP 7341**

1. An initial study and negative declaration have been prepared and have determined that the approval of Tentative Map Tract 7341, as conditioned, will have no significant impact on the environment, cumulative or otherwise.
2. The tentative parcel map substantially conforms to the State Subdivision Map Act, the City's Subdivision Regulations, the General Policies Plan, and the City of Hayward Zoning Ordinance.
3. The site relatively site with adequate and safe access and is therefore physically suitable for the proposed type of development.
4. The design of the subdivision and the proposed improvements are **not** likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat as the site is currently developed with a single-family home within an urban area that is not near fish or wildlife or their habitat.
5. The design of the subdivision and the proposed improvements are **not** likely to cause serious health problems as there are no hazardous materials on the site and the proposed project is residential and will not generate any harmful substances.
6. Existing streets and utilities are adequate to serve the project.
7. None of the findings set forth in Section 64474 of the Subdivision Map Act<sup>1</sup> have been made.

---

<sup>1</sup> The findings of Section 66474 set forth the grounds for denial of a tentative map which are as follows:

- (a) That the proposed map is not consistent with applicable general and specific plans as specified in Section 65451.
- (b) That the design or improvement of the proposed subdivision is not consistent with applicable general and specific plans.
- (c) That the site is not physically suitable for the type of development.
- (d) That the site is not physically suitable for the proposed density of development.
- (e) That the design of the subdivision or the proposed improvements is likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.
- (f) That the design of the subdivision or type of improvements is likely to cause serious public health problems.
- (g) That the design of the subdivision or the type of improvements will conflict with easements, acquired by the public at large, for access through or use of, property with the proposed subdivision.

**CONDITIONS OF APPROVAL  
TENTATIVE TRACT MAP 7341**

Unless otherwise stated, all necessary easements shall be dedicated, and all improvements shall be designed and installed at no cost to the City of Hayward.

All improvements shall be designed and constructed in accordance with the City of Hayward Municipal Code – Chapter 10, Article 3, and Standard Specifications and Details – unless otherwise indicated hereinafter.

The applicant/developer's engineer shall perform all design work unless otherwise indicated.

**A. PRIOR TO THE RECORDATION OF THE FINAL MAP**

**IMPROVEMENTS**

Improvement plans shall be submitted to the City Engineer for review and approval. Subject plans shall, in addition to the standard improvements, incorporate the following special design requirements:

**Interior Private Driveway**

1. The entrance to the private driveway shall be designed per City Standard Detail SD 109 utilizing a 20-foot-wide width.
2. The onsite streetlights and pedestrian lighting shall be of a decorative design approved by the Planning Director. The street light locations shall be approved by the City Engineer.
3. The interior private driveway curb returns shall have a minimum 10-foot radii.
4. The emergency vehicle access onto Winton Avenue shall include an electronically controlled gate with a lock box or other access control device approved by the Fire Chief and the Planning Director.

**Alice Street and Winton Avenue**

5. Street lights, that conform to City Standard Detail SD-120, shall be installed across the Alice Street and Winton Avenue property frontages if determined necessary by the City Engineer. The locations of these lights shall be approved by the City Engineer.
6. Any driveways to be abandoned shall be removed and replaced with standard curb gutter and sidewalk to match the existing improvements.

## **CONDITIONS OF APPROVAL TENTATIVE TRACT MAP 7341**

Unless otherwise stated, all necessary easements shall be dedicated, and all improvements shall be designed and installed at no cost to the City of Hayward.

All improvements shall be designed and constructed in accordance with the City of Hayward Municipal Code – Chapter 10, Article 3, and Standard Specifications and Details – unless otherwise indicated hereinafter.

The applicant/developer's engineer shall perform all design work unless otherwise indicated.

### **A. PRIOR TO THE RECORDATION OF THE FINAL MAP**

#### **IMPROVEMENTS**

Improvement plans shall be submitted to the City Engineer for review and approval. Subject plans shall, in addition to the standard improvements, incorporate the following special design requirements:

##### **Interior Private Driveway**

1. The entrance to the private driveway shall be designed per City Standard Detail SD 109 utilizing a 20-foot-wide width.
2. The onsite streetlights and pedestrian lighting shall be of a decorative design approved by the Planning Director. The street light locations shall be approved by the City Engineer.
3. The interior private driveway curb returns shall have a minimum 10-foot radii.
4. The emergency vehicle access onto Winton Avenue shall include an electronically controlled gate with a lock box or other access control device approved by the Fire Chief and the Planning Director.

##### **Alice Street and Winton Avenue**

5. Street lights, that conform to City Standard Detail SD-120, shall be installed across the Alice Street and Winton Avenue property frontages if determined necessary by the City Engineer. The locations of these lights shall be approved by the City Engineer.
6. Any driveways to be abandoned shall be removed and replaced with standard curb gutter and sidewalk to match the existing improvements.

7. The applicant must obtain a street vacation on Winton Avenue between the sidewalk and the subject property then incorporate that vacated property to the tract property before the City Engineer approves the final map.

### **Storm Drainage**

8. The proposed subdivision storm drain system shall be a private system owned and maintained by the homeowners association.
9. The Hydrology and Hydraulics Criteria Summary, Alameda County Flood Control and Water Conservation District, latest edition shall be used to determine storm drainage runoff. A detailed grading and drainage plan with supporting calculations and a completed Drainage Review Checklist shall be approved by the City Engineer.
10. The project plans shall include storm water measures for the operation and maintenance of the project to be approved by the City Engineer. The project plan shall identify Best Management Practices (BMPs) appropriate to the uses conducted onsite to effectively prevent the entry of pollutants into storm water runoff.
11. The project plan measures shall also include erosion control measures to prevent soil, dirt, debris and contaminated materials from entering the storm drain system, in accordance with the regulations outlined in the ABAG Erosion and Sediment Control Handbook.
12. The applicant/developer is responsible for ensuring that all contractors are aware of all storm water quality measures and implement such measures. Failure to comply with the approved construction BMPs will result in the issuance of correction notices, citations or a project stop order.
13. The project shall not block runoff from adjacent properties. If needed, a drainage system shall be installed along the outside perimeter of the north property line. The necessity of an off-site system, its design and location shall be approved by the City Engineer.
14. The project shall not augment runoff to adjacent properties. The drainage area map developed for the hydrology design shall clearly indicate all the areas tributary to the project area. The developer is required to mitigate blocked run-offs or augmented runoffs with off-site and/or on-site improvements.
15. All storm drain inlets must be labeled "No Dumping - Drains to Bay" using City approved methods.

### **Sanitary Sewer System**

16. The developer is responsible for installing a new 8-inch building court sewer main extending perpendicular from the 8-inch main in Winton Avenue. A Sanitary Sewer Manhole per SD-304 shall be installed at the junction. Sewage flows from this project shall be directed to the new line.
17. The on-site sanitary sewer system shall be a private system designed in accordance with the City of Hayward standard details. A standard sanitary sewer manhole shall be constructed at the end of the sewer mains.
18. Sanitary sewer service is available subject to standard conditions and fees in effect at the time of application.
19. Each unit shall have a separate sanitary sewer lateral.
20. The minimum separation between sanitary sewer laterals and water services shall be 6-feet.

#### **Water System**

21. Water service is available subject to standard conditions and fees in effect at the time of application.
22. Each unit shall be individually metered. The developer shall install individual radio read water meters behind the face of curb. The water service may require a multiple meter manifold designed per City of Hayward Standard Detail SD-219. The necessity of the manifold and its location shall be approved by the City Engineer. The location of the meters shall be approved by the City Engineer.
23. Operation of valves on the Hayward Water System shall only be performed by City of Hayward Water Distribution personnel.

#### **Utilities**

24. All service to dwellings shall be an "underground service" designed and installed in accordance with the Pacific Gas and Electric Company, Pacific Bell Company and AT&T Broadband Company regulations, including transformers.
25. All proposed surface-mounted hardware (fire hydrants, electroliers, etc.) along the proposed streets shall be located within the public utility easement in accordance with the requirements of the City Engineer or, where applicable, the Fire Chief.
26. All utilities shall be designed in accordance with the requirements of the City of Hayward and applicable public agency standards.

### **Landscaping and Irrigation**

27. Prior to the approval of the improvement plans, a detailed landscaping and irrigation plan for the common areas and front yards shall be prepared by a licensed landscape architect and submitted for review and approval by the City's Landscape Architect. Planting and irrigation shall comply with the City's *Water Efficient Landscape Ordinance*.
28. Minimum 24" box trees shall be planted along the property frontage. The type, number, and location of these trees shall be approved by the City's Landscape Architect.
29. Construct Class B Portland Cement concrete curbs to a height of 6-inches above the finished pavement anywhere landscaped areas adjoin driveway and parking areas.
30. Landscape plans shall specify site amenities such as benches, tables, fencing, play equipment and barbecues for the common open space areas.
31. Within all required landscape areas, a complete automatic sprinkler system with an automatic on/off mechanism shall be installed. A hose bib shall be provided within each private courtyard.

### **Walls and Trellises and Entry Features**

32. A 6-foot high wall shall be erected along the north and west property lines. The wall shall be treated with a graffiti sealant.
33. All proposed retaining walls shall be constructed with decorative reinforced concrete.

### **Dedications, Easements and Encroachment Permits**

34. The final map shall reflect:
  - a. Dedication of the Public Utility Easement within the boundaries of the proposed private streets.
  - b. Dedication of an emergency vehicle access easement at Winton Avenue as identified on the approved tentative map.
  - c. The acquisition of the excess right-of-way obtained from the City at the corner of Alice Street and Winton Avenue.
  - d. Dedication of a "landscape easement" for those landscape areas located outside of the buildings and private courtyards along the Alice Street and Winton Avenue frontages.

### **Conditions, Covenants, and Restrictions**

35. Prior to the sale of any individual unit, or prior to the acceptance of site improvements, whichever first occurs, a homeowners' association shall be created to maintain the common

area landscaping, open space amenities and the wall along the north and west property lines.

36. Conditions, Covenants and Restrictions (CC&R's) shall be prepared for the project and be reviewed and approved by the Planning Director that shall include the following conditions:
- a. Each owner shall automatically become a member of the association and shall be subject to a proportionate share of maintenance expenses;
  - b. A reserve fund shall be maintained to cover the costs of replacement and repair;
  - c. The association shall be managed and maintained by a professional property management company;
  - d. Provisions for towing unauthorized vehicles from the site;
  - e. A requirement that a Homeowners' Association Architectural Review Committee be established to review and approve all exterior improvements; including fences, walls or changes to individual homes to ensure consistency with the CC&Rs;
  - f. The site shall be maintained in good repair, and free of debris at all times;
  - g. A requirement that the building exteriors and walls shall be maintained free of graffiti. The owner's representative shall inspect the premises on a weekly basis and any graffiti shall be removed within 48 hours of inspection or within 48 hours of notification by the City's Community Preservation Officer;
  - h. The homeowners' association shall maintain the irrigation system and maintain the landscaping within the common area in a healthy, weed-free condition at all times. The homeowner's representative shall inspect the landscaping on a monthly basis and any dead or dying plants (plants that exhibit over 30% dieback) shall be replaced within 10 days;
  - i. Landscaping and irrigation shall be maintained in all common areas or the City shall have the right to enter upon the "Private Landscape Easements" to maintain the exterior portions of the common area at the expense of the homeowners association per Section 10-3.385 of the Subdivision Ordinance;
  - j. A tree removal permit is required prior to the removal of any tree with a diameter of 10-inches or larger;
  - k. Trees shall not be severely pruned, topped, or pollarded and any trees that are pruned in this manner shall be replaced with a tree species selected by, and size determined by the Landscape Architect, within the timeframe established by the City and pursuant to the Municipal code; and
  - l. Each resident shall participate in the City's recycling program.

#### Subdivision Agreement

37. The subdivider shall execute a subdivision agreement and post security with the City that shall secure the construction of the public improvements per Section 10-3.332, Security for Installation of Improvements, of the Municipal Code. Insurance shall be provided per the terms of the subdivision agreement.

## **DURING CONSTRUCTION**

38. The following control measures for construction noise, grading and construction activities shall be adhered to, unless otherwise approved by the Director of Community and Economic Development/Planning Director or City Engineer:
- a. Grading and construction activities shall be limited to the hours 7:30 AM to 6:00 PM on weekdays; there shall be no grading or construction activities on the weekend or national holidays;
  - b. Grading and construction equipment shall be properly muffled;
  - c. Unnecessary idling of grading and construction equipment is prohibited;
  - d. Stationary noise-generating construction equipment, such as compressors, shall be located as far as practical from occupied residential housing units;
  - e. Applicant/developer shall designate a "noise disturbance coordinator" who will be responsible for responding to any local complaints about construction noise;
  - f. The developer shall participate in the city's recycling program during construction.
  - g. Daily clean up of trash and debris shall occur along the Alice Street and Winton Avenue frontages;
  - h. The site shall be watered twice daily during site grading and earth removal work, or at other times as may be needed to control dust emissions;
  - i. All grading and earth removal work shall follow remediation plan requirements, if soil contamination is found to exist on the site;
  - j. Pave, apply water three times daily, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites;
  - k. Sweep daily (with water sweepers) all paved access roads, parking areas and staging areas at construction sites;
  - l. Apply (non-toxic) soil stabilizers or hydroseed to inactive construction areas (previously graded areas inactive for 10-days or more);
  - m. Enclose, cover, water twice daily or apply (non-toxic) soil binders to exposed stockpiles (dirt, sand, etc.).
  - n. Gather all construction debris on a regular basis and place them in a dumpster or other container which is emptied or removed on a weekly basis. When appropriate, use tarps on the ground to collect fallen debris or splatters that could contribute to storm water pollution;
  - o. Remove all dirt, gravel, rubbish, refuse and green waste from the sidewalk, street pavement, and storm drain system adjoining the project site. During wet weather, avoid driving vehicles off paved areas and other outdoor work;
  - p. Broom sweep the sidewalk and public street pavement adjoining the project site on a daily basis. Caked on mud or dirt shall be scraped from these areas before sweeping;
  - q. No site grading shall occur during the rainy season, between October 15 and April 15, unless approved erosion control measures are in place.
  - r. Install filter materials (such as sandbags, filter fabric, etc.) at the storm drain inlet nearest the downstream side of the project site prior to: 1) start of the rainy season; 2) site dewatering activities; or 3) street washing activities; and 4) saw cutting asphalt or concrete, or in order to retain any debris or dirt flowing into the City storm drain system.

- Filter materials shall be maintained and/or replaced as necessary to ensure effectiveness and prevent street flooding. Dispose of filter particles in the trash;
- s. Create a contained and covered area on the site for the storage of bags of cement, paints, flammables, oils, fertilizers, pesticides or any other materials used on the project site that have the potential for being discharged to the storm drain system through being windblown or in the event of a material spill;
  - t. Never clean machinery, tools, brushes, etc., or rinse containers into a street, gutter, storm drain or stream. See "*Building Maintenance/Remodeling*" flyer for more information;
  - u. Ensure that concrete/gunite supply trucks or concrete/plasters finishing operations do not discharge washwater into street gutters or drains; and
  - v. The applicant/developer shall immediately report any soil or water contamination noticed during construction to the City Fire Department Hazardous Materials Division, the Alameda County Department of Health and the Regional Water Quality Control Board.
39. A representative of the soils engineer shall be on the site during grading operations and shall perform such testing as deemed necessary by the City Engineer. The representative of the soils engineer shall observe grading operations with recommended corrective measures given to the contractor and the City Engineer.
40. The minimum soils sampling and testing frequency shall conform to Chapter 8 of the Caltrans Construction Manual. The subdivider shall require the soils engineer to daily submit all testing and sampling and reports to the City Engineer.

**PRIOR TO CONNECTION OF UTILITIES AND ISSUANCE OF CERTIFICATES OF OCCUPANCY**

41. The applicant/developer shall pay the following fees, the amount of the fee shall be in accordance with the fee schedule in effect at the time of vesting tentative map approval;
- a. Supplemental Building Construction and Improvement Tax;
  - b. School Tax; and
  - c. Park Dedication in-lieu fees for each unit.
  - d. Water Facilities Fee and Sewer Connection Fee for each dwelling unit at the rate in effect when the utility service permit for the dwelling unit is issued.
42. Any damaged curb, gutter and/or sidewalk along the Alice Street and Winton Avenue property frontages shall be repaired or replaced to the satisfaction of the City Engineer.
43. A reduced pressure backflow preventer shall be installed behind the water meter per City of Hayward Standard Detail 202.
44. Prior to granting occupancy, water services shall be installed by City crews at the developer's expense. The application for water services shall be presented to the City Inspector.

45. Prior to the City setting the water meters, the subdivider shall provide the Water Department with certified costs covering the installation of the public water mains and appurtenances.
46. All common area landscaping, irrigation and other required improvements shall be installed according to the approved plans.
47. The street light electroliers along both the private and public streets shall be in operating condition as approved by the City Engineer.

**PRIOR TO CITY APPROVAL OF THE TRACT IMPROVEMENTS AS BEING COMPLETED**

48. All tract improvements, including the complete installation of all improvements relative to streets, fencing, sanitary sewer, storm drainage, water system, underground utilities, etc., shall be completed and attested to by the City Engineer before approval of occupancy of any unit. Where facilities of other agencies are involved, such installation shall be verified as having been completed and accepted by those agencies.
49. All common area landscaping, irrigation and other required improvements shall be installed and attested to by the City Landscape Architect prior to acceptance of tract improvements, or occupancy of 80 percent of the dwelling units, whichever first occurs.
50. An AC overlay along the Alice Street frontage may be required by the City Engineer, if it is determined that it is necessary due to deterioration resulting from heavy traffic during the construction.
51. The improvements associated with the Pacific Gas and Electric Company, Pacific Bell Company and AT&T Broadband shall be installed to the satisfaction of the respective companies.
52. The subdivider shall submit an "as built" plan indicating the following:
  - a. All the underground facilities, sanitary sewer mains and laterals, water services (including meter locations), Pacific Gas and Electric, Pacific Bell facilities, AT&T Broadband, etc; and
  - b. All the site improvements, except landscaping species, buildings and appurtenant structures.

## **CITY OF HAYWARD NEGATIVE DECLARATION**

Notice is hereby given that the City of Hayward finds that could not have a significant effect on the environment as prescribed by the California Environmental Quality Act of 1970, as amended will occur for the following proposed project:

### ***I. PROJECT DESCRIPTION:***

Zone Change No. PL-2001-0223 and Tentative Tract Map No. 7341- Request to raze an existing single-family dwelling, vacate excess right-of-way at the corner of Alice Street and Winton Avenue and to rezone the property from CO (Commercial Office) to PD (Planned Development) District and approve a tentative tract map for the purpose of constructing eight townhouses. The project is located at 338 Winton Avenue, at the Corner of Winton Avenue and Alice Street.

### ***II. FINDING PROJECT WILL NOT SIGNIFICANTLY AFFECT ENVIRONMENT:***

The proposed project could not have a significant effect on the environment.

### ***FINDINGS SUPPORTING DECLARATION:***

1. The proposed project has been reviewed according to the standards and requirements of the California Environmental Quality Act (CEQA) and an Initial Study Environmental Evaluation Checklist has been prepared for the proposed project. The Initial Study has determined that the proposed project could not result in significant effects on the environment.
2. The project will not adversely affect any scenic resources.
3. The project will not have an adverse effect on agricultural land since it will be developed on property that was once part of a parcel developed with a single-family home within an urban setting.
4. The project will not result in significant impacts related to changes into air quality since any impacts would be temporary occurring during the construction phase. The measures taken to mitigate impacts are required to meet the State air quality standards specified in the Clean Air Plan adopted by the Bay Area Quality Management District. In addition the City requires the developer to submit a construction Best Management Practice (BMP) program prior to the issuance of any building permit.
5. The project will not result in significant impacts to biological resources such as wildlife and wetlands since it will be developed on a lot that was developed with a single-family home within an urban setting.

6. The project will not result in a significant impacts to cultural resources including historical resources, archaeological resources, paleontological resources, unique topography or disturb human remains because the project will be developed on a lot that was developed with a single-family home within an urban setting.
7. The project site is not located within a "State of California Earthquake Fault Zone." Construction related to this project will be required to comply with the Uniform Building Code Standards to minimize seismic risk due to ground shaking.
8. The project will not lead to the exposure of people to hazardous materials. The lot is developed with a single-family home located in a residential neighborhood within an urban setting.
9. The project will meet all water quality standards. Drainage improvements will be made to accommodate runoff.
10. The project is consistent with the policies of the City General Policies Plan, the General Plan Map designation of Medium Density Residential, the Zoning Ordinance and the Burbank Neighborhood Plan.
11. The project could not result in a significant impact to mineral resources since the site is developed with a single family home and mineral resources do not exist on the project site.
12. The project will not have a noise impact and all interior noise standards as specified in the Noise Element of the General Policies Plan will be met.
13. The project will introduce 8 townhouses into an area where growth is desirable and anticipated by the General Policies Plan. The zoning designation is Commercial Office and the General Plan Map land use designation for the site is Medium Density Residential. Both permit the site to be developed with 8 townhouse units replacing a single family home. The former owner of the single-family home will move and therefore, displacement will not occur.
14. The project will not result in a significant impact to public services. School fees will be paid prior to the issuance of a building permit.
15. The project has adequate open space; the payment of Park Dedication fees is required prior to the issuance of a building permit.
16. The project will not result in significant impacts to traffic or result in changes to traffic patterns or emergency vehicle access. The project would generate 3-4 vehicle trips during peak hours and 47 trips a day.
17. The project will not require additional service systems. There are sanitary sewer, water, and storm drain mains available of adequate size to serve this project.

I. **PERSON WHO PREPARED INITIAL STUDY:**

Tim Koonze Assistant Planner  
Dated: September 20, 2001

II. **COPY OF INITIAL STUDY IS ATTACHED**

\_\_\_\_\_  
For additional information, please contact the City of Hayward, Planning Division, 777 B Street, Hayward, CA 94541-5007, telephone (510) 583-4206 or (510) 583-4207, or e-mail [timk@ci.hayward.ca.us](mailto:timk@ci.hayward.ca.us).  
\_\_\_\_\_

**DISTRIBUTION/POSTING**

- Provide copies to all organizations and individuals requesting it in writing.
- Reference in all public hearing notices to be distributed 20 days in advance of initial public hearing and/or published once in Daily Review 20 days prior to hearing.
- Project file.
- Post immediately upon receipt at the City Clerk's Office, the Main City Hall bulletin board, and in all City library branches, and do not remove until the date after the public hearing.

## Environmental Checklist Form

1. Project title: Zone Change No. PL 2001-0233 and Tentative Tract Map No. 7341
2. Lead agency name and address: City of Hayward, 777 B Street, Hayward, CA 94541
3. Contact person and phone number: Tim Koonze Assistant Planner (510) 583-4207
4. Project location: 338 Winton Avenue, at the Corner of Winton Avenue and Alice Street.
5. Project sponsor's name and address: Brian Purcell for PF Trust (Applicant), Brian and Kimberly Purcell (Owners), 2063 Mountain Boulevard, #6, Oakland, CA 94611
6. General plan designations: Medium Density Residential
7. Zoning: CO (Commercial Office) District
8. Description of project: (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or offsite features necessary for its implementation. Attach additional sheets if necessary.) Request to construct eight townhouses on a 30,821-square-foot lot, adopt a Tract Map and change the zoning from Commercial Office District to Planned Development District.
9. Surrounding land uses and setting: Briefly describe the project's surroundings The site is within a neighborhood developed with single- and multi-family residential homes, adjacent to a single-family home used as a commercial office and a neighborhood serving shopping center.
10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement.) N/A.

### ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> Aesthetics                    | <input type="checkbox"/> Agriculture Resources              | <input type="checkbox"/> Air Quality            |
| <input type="checkbox"/> Biological Resources          | <input type="checkbox"/> Cultural Resources                 | <input type="checkbox"/> Geology / Soils        |
| <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Hydrology / Water Quality          | <input type="checkbox"/> Land Use / Planning    |
| <input type="checkbox"/> Mineral Resources             | <input type="checkbox"/> Noise                              | <input type="checkbox"/> Population / Housing   |
| <input type="checkbox"/> Public Services               | <input type="checkbox"/> Recreation                         | <input type="checkbox"/> Transportation/Traffic |
| <input type="checkbox"/> Utilities / Service Systems   | <input type="checkbox"/> Mandatory Findings of Significance |   |

### DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- ☒ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☐ I find that although the proposed project could have a significant effect on the environment,

there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## ENVIRONMENTAL ISSUES:

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
<b>I. AESTHETICS -- Would the project:</b>				
a) Have a substantial adverse effect on a scenic vista? <i>The project (8 townhouses) will not adversely affect scenic vistas.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? <i>The project will not damage scenic resources. The house on the property is not an historic building.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Substantially degrade the existing visual character or quality of the site and its surroundings? <i>A single-family home will be replaced with 8t-townhouses that are in conformance with City of Hayward Zoning Ordinance development standards and Hayward Design Guidelines.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? <i>The project will not be a source of substantial light or glare.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>II. AGRICULTURE RESOURCES:</b> In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use. <i>The project site is not within a farmland area.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract? <i>The project is not located in an agricultural district or an area used for agricultural purposes.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use? <i>See II b.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
--------------------------------------	---	------------------------------------	--------------

III. AIR QUALITY -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

- a) Conflict with or obstruct implementation of the applicable air quality plan? ☐ ☐ ☐ ☒

*The project will not affect air quality. Properties within the City of Hayward are required to meet State air quality standards specified in the Clean Air Plan adopted by the Bay Area Quality Management District.*

- b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation? *See III a.* ☐ ☐ ☐ ☒

- c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)? ☐ ☐ ☐ ☒

*Any impacts to air quality will be temporary lasting during the construction phase. See III a.*

- d) Expose sensitive receptors to substantial pollutant concentrations? *See III a.* ☐ ☐ ☐ ☒

- e) Create objectionable odors affecting a substantial number of people? *See III a.* ☐ ☐ ☐ ☒

IV. BIOLOGICAL RESOURCES -- Would the project:

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? ☐ ☐ ☐ ☒

*The project site at one time was developed with a single-family home. Since the property is urban in nature, biological resources will not be adversely affected.*

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service? *See IV a.* ☐ ☐ ☐ ☒

- c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? *See IV a.* ☐ ☐ ☐ ☒

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? <i>See IV a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? <i>The project is in conformance with the General Policies Plan and the Burbank Neighborhood Plan.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional or state habitat conservation plan? <i>The project is in an urban area and is developed with a single-family home.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**V. CULTURAL RESOURCES** -- Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5? <i>No known historical resources exist on-site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5? <i>No known archaeological resources exist in on-site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? <i>No known paleontological resources exist on-site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Disturb any human remains, including those interred outside of formal cemeteries? <i>No known human remains are located on-site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**VI. GEOLOGY AND SOILS** -- Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: <i>The project is outside the Hayward Special Studies Fault Zone.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. <i>The project is outside the Hayward Special Studies Fault Zone.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
ii) Strong seismic ground shaking? <i>The project is not located within a "State of California Earthquake Fault Zone and will be required to comply with the Uniform Building Code Standards to minimize seismic risk due to ground shaking.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii) Seismic-related ground failure, including liquefaction? <i>Liquefaction and differential compaction is not considered to be a serious problem on this site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv) Landslides? <i>The project is not located within an area subject to landslides.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in substantial soil erosion or the loss of topsoil? <i>The project is within an urban setting that does not include agricultural land.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? <i>Prior to issuance of any building permit, engineering and building staff will review a geologic and soils investigation report to design adequately the building foundations for the soil type for new projects. Judging from past geologic activities in the area of the project, the soil types have not exhibited any of the characteristics that would indicate that any of these conditions exist or are possible.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property? <i>Prior to issuance of a building permit, engineering and building staff will review a geologic and soils investigation report to adequately design the building foundations for the soil type on-site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater? <i>The project will be connected to the City of Hayward sewer system.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>VII. HAZARDS AND HAZARDOUS MATERIALS - Would the project:</b>				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? <i>The site is located within a residential neighborhood and is developed with a single-family home. There is no evidence of hazardous materials.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? <i>See VII a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? <i>See VII a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? <i>See VII a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area? <i>The project is not located within an airport zone.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area? <i>See VIII e.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? <i>The project will not interfere with any known emergency response plan or emergency evacuation plan. The Hayward Fire Department serves the neighborhood where the townhouses are to be constructed. Emergency response times will be maintained.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands? <i>The project is not located in an area of wildlands and is not adjacent to wildlands.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>VIII. HYDROLOGY AND WATER QUALITY -- Would the project:</b>				
a) Violate any water quality standards or waste discharge requirements? <i>The project will meet all water quality standards. Drainage improvements will be made to accommodate runoff.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<i>The site will be served by East Bay Municipal Utilities District (EBMUD). Therefore, water quality standards will not be violated and groundwater supplies will not be depleted. Furthermore, recharge of the groundwater table will not be affected.</i>				
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<i>The project is not located near a stream or a river. The construction of the 8 townhouses will not result in substantial erosion or siltation on- or off-site.</i>				
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<i>The project is within an urban area and has been developed as such. Drainage patterns on the site will not cause flooding.</i>				
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<i>The amount of run-off from the project is not anticipated to increase and will not exceed the capacity of the stormwater drainage system. See VIII a.</i>				
f) Otherwise substantially degrade water quality? <i>See VIII a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<i>According to FEMA Flood Insurance Rate Maps, the 100-year flood hazard area is not contained this site.</i>				
h) Place within a 100-year flood hazard area structures which would impede or redirect flood flows? <i>See VIII g.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam? <i>See VIII g.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
j) Inundation by seiche, tsunami, or mudflow? <i>The project is not in a location that would allow these phenomena to affect the site.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>IX. LAND USE AND PLANNING</b> - Would the project:				
a) Physically divide an established community? <i>The project will not physically divide the existing community.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect? <i>The project is consistent with the policies of the City General Policies Plan, the Zoning Ordinance and the Burbank Neighborhood Plan.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Conflict with any applicable habitat conservation plan or natural community conservation plan? <i>See IV f.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>X. MINERAL RESOURCES</b> - Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? <i>The project will not result in a significant impact to mineral resources since the project study area is a developed urbanized area that does not contain mineral resources.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? <i>See X a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>XI. NOISE</b> - Would the project result in:				
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? <i>Exposure of persons to or generation of any new noise or noise levels in excess of standards established in the Noise Element of the Hayward General Plan or the Municipal Code, or applicable standards of other agencies will not from the 8-unit townhouse project. All City noise standards are required to be met and maintained.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels? <i>See XI a.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project? <i>See XI a</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project? <i>See XI a</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? <i>See VII e.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels? <i>See VII e.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## XII. POPULATION AND HOUSING -- Would the project:

a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? <i>The project is within the anticipated density for the site. See IX b.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere? <i>Eight townhouses will replace one single-family home. See IX b.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere? <i>See IX b and XII a &amp; b.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

## XIII. PUBLIC SERVICES

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

**Fire protection?** *The project would not result in the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services. Response times will not be altered. There will not be an increase in governmental costs to provide services to this site. .*

☐ ☐ ☐ ☒

**Police protection?** *See XIII a.*

☐ ☐ ☐ ☒

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
<b>Schools?</b> <i>The Hayward Unified School District has planned for student enrolment based on anticipated densities specified in the City of Hayward General Policies Plan. This project will not generate a number of students that cannot be served by existing facilities. In addition, school fees will be collected prior to the issuance of a building permit.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Parks?</b> <i>The project will be is served by the Hayward Area Recreation and Park District. A park dedication fee is required to be paid prior to the issuance of a building permit.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Other public facilities?</b> <i>No other public facilities will be significantly impacted.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### XIV. RECREATION --

- |   |                          |                          |                          |                                     |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?<br><i>The Hayward Area Recreation and Park District are currently serving the entire neighborhood. See XIII a (parks).</i> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? <i>See XIV a.</i>   | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

#### XV. TRANSPORTATION/TRAFFIC -- Would the project:

- |   |                          |                          |                          |                                     |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?<br><i>Townhouses traditionally produce fewer trips than single-family homes. The anticipated traffic impact is the addition of 8 trips during peak hours and 80 trips a day. This increase is not significant and will not have an impact.</i> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways? <i>See XV a.</i>   | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks? <i>The project will not affect air traffic patterns.</i>  | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? <i>Traffic hazardous do to design features or incompatible uses will not result from the construction of the 8 townhouses.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Result in inadequate emergency access? <i>The Hayward Fire Department has reviewed the project and finds the project acceptable to Hayward Fire Department requirements and standards. Current Fire Codes will be met.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Result in inadequate parking capacity? <i>Adequate on-site parking will be provided.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)? <i>The project does not conflict with adopted policies supporting alternative transportation. It is located walking distance from the Hayward BART station and Alameda County Transit buses.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**XVI. UTILITIES AND SERVICE SYSTEMS - Would the project:**

a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board? <i>Wastewater treatment requirements are met by the City of Hayward therefore, all treatment requirements will continue to be met.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects? <i>The City of Hayward wastewater facility has the capacity to serve the addition of 8 townhouses.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects? <i>The existing storm drain system has the capacity to serve the 8 townhouses.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed? <i>The East Bay Municipal Utilities District supplies water and the service to the 8 townhouses.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

	Potentially Significant Impact	Potentially Significant Unless Mitigation Incorporation	Less Than Significant Impact	No Impact
e) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? <i>The City of Hayward operates its own wastewater facility. This facility has the capacity to accommodate the amount of wastewater that will be generated by the project.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs? <i>Waste Management of Alameda County will dispose the solid waste. The residents will participate in a citywide recycling program. The Altamont landfill is available to the City of Hayward until 2009 and has sufficient capacity to handle the amount of solid waste generated by the project. The landfill recently received an approval that increases the capacity and adds 25 years to the life of the landfill to the year 2034.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Comply with federal, state, and local statutes and regulations related to solid waste? <i>The project will participate in the Waste Management of Alameda County recycling program under contract with the Oro Loma Sanitary District. Service will remain the same for this site as the entire neighborhood.</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

#### XVII. MANDATORY FINDINGS OF SIGNIFICANCE --

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
